With the rising cost of childcare parents can see how much money need to be set aside to provide their child/children with adequate care depending on the state they live in, we can see from 2009 and 2018 Massachusetts continues to be on the top 5 for most expensive state for Child Care Cost. Families living in the states with higher childcare costs should place close attention to what they are looking to get into if they were to need childcare in the future.
